

# Shopper Approved® Engine 23 Server Installation

Version 1.2.x

In order to better serve you, please have the following information ready:

- SSH credentials for your web server with a user that has read/write privileges to the Magento store.
- Any SSH connection requirements. For example, your web server accepts SSH connections through a non-standard port.
- Your Shopper Approved account username and password.
- It may be required to add “23.236.154.2” to your IP address whitelist

Please fill out and email this template to [shopperapproved@engine23.com](mailto:shopperapproved@engine23.com) with subject “Shopper Approved Installation - [ www.yourwebsite.com ]”

## SSH Credentials

IP/domain	Port [22]
Username	Whitelisted 23.236.154.2? Yes      No      N/A
Password	Magento installation folder [/var/www/magento]

If you would like us to do the initial extension configuration, we will also need access to the Shopper Approved® information.

## Shopper Approved® Information

Domain	API Key
Site ID	Merchant Survey Code

We will only use this access only for the installing the Shopper Approved® Extension and for no other purpose.
